(Note3) FFW is a ratio of the number of listed shares for index calculation. The number of listed shares for index calculation normally coincides with that of the number of shares in issue, but there are some cases where the number of listed shares is different from the number of issued shares.

(Note4) FFW will be periodically reviewed once a year and the timing of the FFW review will differ according to the settlement terms of listed companies. In addition to the periodic review, extraordinary review will be conducted in cases where the ownership distribution has changed significantly, for example through the allocation of new shares to a third party.

(Note5) "#" or "*" appearing in the "FFW in TOPIX" column signifies that the liquidity factor is applied to the issues. Issues marked with "#" fall under liquidity criteria, while issues marked with "*" are those newly added to TOPIX as of March 1, 2010.
