

Futures Industry Association Japan Chapter

March 26th, 2009

INVITATION

FIA-Japan Technology Committee Seminar “Exchange Trading Platform: NYSE Technologies’ LIFFE CONNECT”

It is our great pleasure to invite you to the FIA-Japan Technology Committee seminar arranged in conjunction with NYSE Technologies on Friday, April 24th.

Many changes are underway to improve, modernize and internationalize the derivatives markets in Japan. Currently, there is much focus on upgrading the trading systems at several exchanges. These changes are essential to attract international users of the markets, including prop traders and market makers who demand highly responsive trading engines.

As the second of the serial discussion on latest technologies in futures trading arena, Mr. Stanley Young, CEO of NYSE Technologies and Co-Global CIO of NYSE Euronext will introduce NYSE Euronext’s commercial technology division, and Mr. Paul Phillips, Exchange Solutions Business Development Manager at NYSE Technologies will provide an overview of LIFFE CONNECT, one of the most leading-edge exchange trading platforms operating globally.

We believe this to be an excellent opportunity to familiarize yourselves both the functions and benefits of LIFFE CONNECT and the wider offerings from NYSE Technologies. Courtesy of our generous sponsors, you are also invited to an evening reception after the seminar where you can meet with the speakers and network with other delegates.

We will look forward to seeing you all at the seminar.

Sincerely,

Michael Ross
Chairman,
Technology Committee, FIA-Japan
